### **Stakeholder Provides VMC Update**

Stakeholder Gold Corporation (“**Stakeholder**” or the “**Company**”) (TSX-V: SRC) announces that the final draft of the National Instrument 43-101 report pertaining to the blue quartzite quarry project held by Victoria Mining Corporation (“**VMC**”) (a wholly owned subsidiary of the Company) has been submitted to the TSX Venture Exchange. Travel restrictions due to Covid-19 have contributed to delays in the site visit required by a report author under NI 43-101.

The absence of an accepted NI 43-101 compliant technical report has resulted in project exploration restrictions. Covid-19 transmission characteristics in Brazil have impacted logistical supports for the Company’s work initiatives. Stakeholder will continue to provide project updates as progress permits.
